

Macaws are the most intelligent, beautiful and charismatic birds. Unfortunately at least 50% of their habitat has been destroyed, leaving them with few natural nest cavities to raise their chicks in. Your gift has made it possible for The Ara Project to provide reintroduced, loving Macaw pairs with a home and protection of their chicks from predators and poachers. This breeding season has been the most successful yet because of your support to The Ara Project's artificial nest box program.

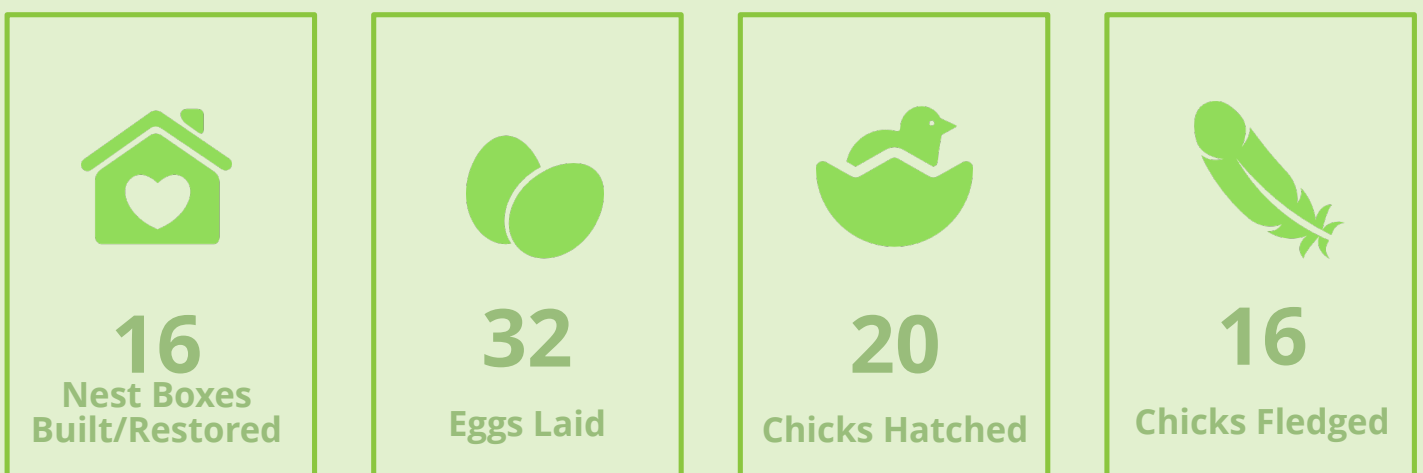

The Ara Project and the Macaws thank you for giving their future hope.

Wild Scarlet Macaws

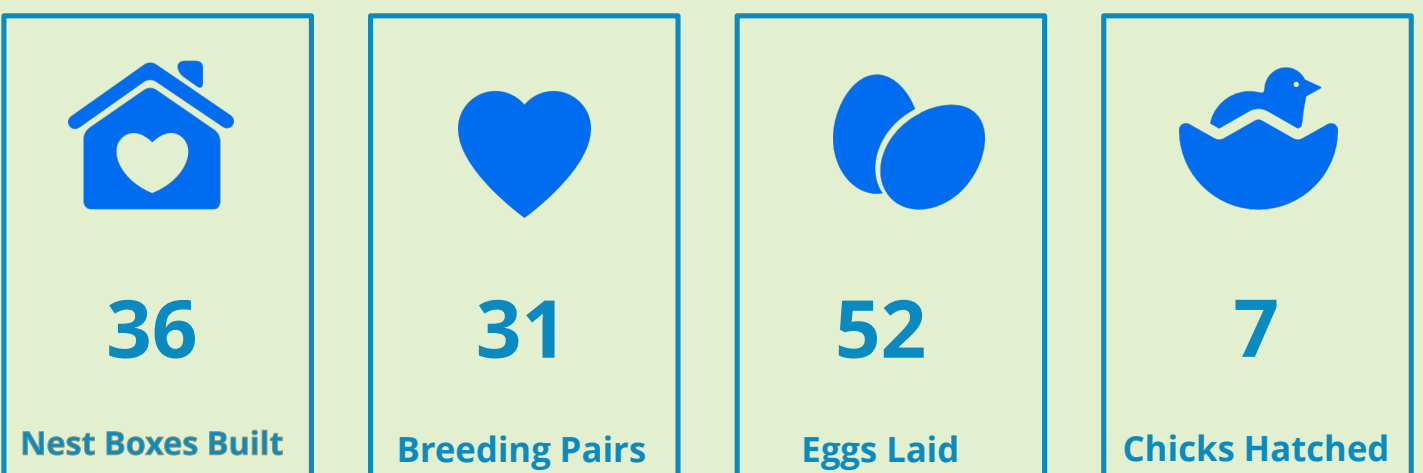

Fun Fact: One of our wild Scarlet Macaw chicks has been named Patrick by local school children!

Wild Great Green Macaws

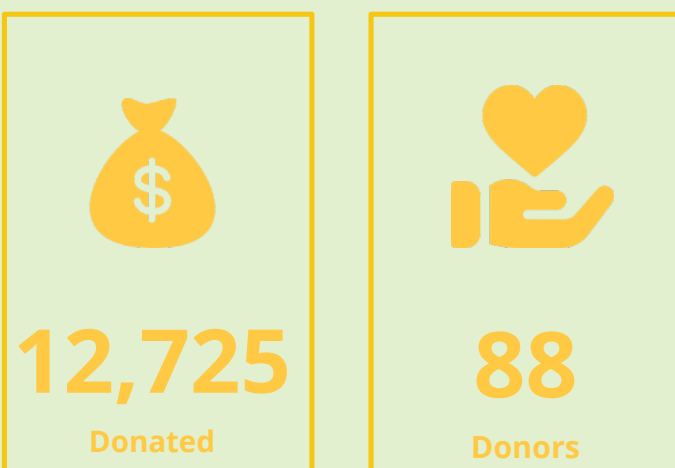

Fun Fact: The field team visited more Great Green nest sites this year than ever before!

Captive Breeding

Fun Fact: Once old enough, our seven captive bred chicks will be released into the wild to fly free!

Finances

**Thank you for supporting
The Ara Project!**

Fun Fact: This all would not be possible without generous gifts from people like you!
